

PRESS RELEASE

Communication and Business Development
sales@boggisrl.eu

MAY 28th 2021, Reggio Emilia - Boggi Aeronautics performed TrakkaCam TC-300 integration tests on Elifriulia's EC135.

The tests have been successfully performed in Italy at Elifriulia's facilities.

Stefano Boggi, CEO at Boggi Aeronautics, said: "It is with great satisfaction that we have successfully performed TrakkaCam TC-300 integration tests on the EC135. We are proud to support helicopter operators in the effort to deliver critical mission accomplishment."

This project reinforces the collaboration between the companies. Boggi Aeronautics developed Trakka cameras integration for worldwide operators. The company also holds an STC that allows the installation of Trakka camera SWE-400 on AW139 helicopters ensuring maximum safety and stability during aerial camera operations.

ABOUT BOGGI AERONAUTICS

Founded in 1999, Boggi Aeronautics is a certified EASA Part 21 DOA and POA (Design and Production Approvals) Italian aeronautical company with specialization in high-end aeronautical equipment and solutions for different kind of operations. The team employs experienced aerospace, mechanical, and electrical engineers and technicians that apply creative conceptual approaches to tackle complicated integration challenges. Boggi Aeronautics is active mainly as an equipment integration development center for special missions with STC approval capability. The company boasts many projects related to aerial work, law enforcement, training and medical equipment development and installation that have been appreciated by fleets all over the world.

Boggi Aeronautics offers customers tailored, mission-essential capabilities as well as off-the-shelf products designed for a variety of airborne operations and platform.

ABOUT TRAKKA SYSTEMS and TrakkaCam TC-300

Trakka Systems is the only original equipment manufacturer to design a comprehensive vision-enhancement solution for all air, land, and marine missions. The solutions approach offers a customizable range of user-friendly-equipment, such as high-intensity tactical searchlights, integrated mapping management software, and gyro-stabilized day/night cameras with terminal imaging, UV detection, and infrared capabilities.

Trakka's TC-300 is a versatile, compact multi-sensor surveillance system that can be installed on various manned and unmanned platforms. Its advanced features and sophisticated image processors embedded within the single-LRU 4-axis gyro-stabilized gimbal exploit images from different sensors to extract features that would otherwise go undetected by a single sensor. With picture-in-picture, split-screen, contrast enhancement and moving target detection, the TrakkaCam TC-300 improves mission success and reduces operator workload in challenging conditions.

ABOUT ELIFRIULIA

Founded in 1971, Elifriulia is one of the longest-running helicopter operator in Italy. Since then, it has been able to grow in terms of professionalism, services, and presence on the market by building a qualified and esteemed company

Elifriulia, as a Robinson Helicopter concessionaire, deals with the sale of rotary-wing aircraft, but over time has been able to specialize in helicopter services such as Public Passenger Transport, Helicopter rescue, Air Work and Flight school
